Alemana

Podcast de los alumnos/as de grado: 'Student Voices: Discourse Diaries'

11/07/2024

The students of Culture and Discourses in English Language 2 have created a podcast in which they discuss some key topics of this subject: nomination strategies and metaphor in public discourse, political correctness, hate speech on social media, as well as radicalisation and misinformation. This is a remarkably outstanding effort that we share with the university community with great joy.
